The University of Oklahoma and Exaptive have partnered to build software that maps the full landscape of research available to the University library system and enables researchers across disciplines to explore visually, find new resources, and identify potential collaborators with greater ease and fewer boundaries in order to create new knowledge.

In the coming months, we will launch a pilot allowing select researchers from multiple institutions to chart a path for wider use and more powerful functionality.

### Express interest in being a part of the pilot:

First Name\*

Please complete this mandatory field.

Last Name\*

Email\*

Your email will only be used to notify you regarding developments in this pilot project.

Institution / Affiliation\*

Department / Research Focus\*

How did you find out about this...\*
